

SANITIZED FOR PUBLIC DISTRIBUTION. This version replaces only the specific network-device identifier of the cardholder's 3D printer with placeholders, consistent with the sanitization applied in the original 2026-06-17 affidavit. The original signed and unsanitized version remains in the cardholder's private records and the bank's dispute file. The case facts, sworn statements, and analysis are otherwise unchanged.

Supplemental Affidavit in Support of Disputed Transaction

Cardholder: Jay Puckett **Email:** investigations@obsidianwatch.org
Date of supplemental affidavit: 2026-06-23 **Merchant:** Creality (Shenzhen Creality 3D Technology Co., Ltd.) **Third party introduced into dispute:** Seel, Inc. (San Francisco, California) **Cross-reference:** This supplemental affidavit supplements, but does not replace, the original sworn affidavit of 2026-06-17 in the same dispute.

1. Purpose of this supplemental statement

I, Jay Puckett, am the cardholder of record for the transaction currently in dispute with Creality. This supplemental affidavit documents developments in the dispute that occurred after the date of my original 2026-06-17 affidavit. The new developments concern the merchant's attempted redirection of remediation through a third-party insurance program (Seel Worry-Free Purchase) and the merchant's request for direct banking-channel transfer information (ACH, wire, or SWIFT) in lieu of normal card-network refund processing.

I am submitting this supplemental statement under penalty of perjury, in continued support of the chargeback already initiated with my bank, and in order to put on the record the merchant conduct that has occurred since my original affidavit was signed.

The chargeback dispute with my bank remains active. Nothing in this supplemental affidavit should be construed as withdrawal, modification, or concession of any element of the original dispute.

2. Timeline of post-2026-06-17 merchant communications

On a date after 2026-06-17 and on or about 2026-06-22, I received a written communication from Creality customer service stating, in substance: “Hello, we have contacted Seel Insurance to extend your case. Please submit your claim as soon as possible. If you have any further questions, please contact us. Thank you for your understanding!”

This communication was received during the period when the chargeback dispute was already active with my bank. Creality did not, in this communication or in any subsequent communication of which I am aware, substantively engage with the underlying dispute (the substitution of routine printer consumables for the represented Creality CR-Scan Otter 3D scanner). Creality did not produce the evidentiary records the bank’s dispute process can compel, as enumerated in Section 5 of my original 2026-06-17 affidavit (carrier weight and dimension records for each of the three shipped packages; proof of delivery; internal warehouse pick list).

Instead, Creality redirected the matter to Seel, Inc., a third-party “Worry-Free Purchase” insurance-program provider, and instructed me to file a claim through Seel.

Shortly thereafter, in continued correspondence regarding refund processing, Creality requested that I provide direct banking-channel transfer information (ACH, wire, or SWIFT) for the purpose of receiving a refund. The request was for routing and account information sufficient to initiate a direct bank deposit, outside the original card-network payment channel through which the disputed transaction was funded.

3. The Seel Worry-Free Purchase coverage and its documented timing limitation

Seel Worry-Free Purchase, per the public terms of service published at seel.com, is an opt-in protection program that the customer must elect at the point of purchase. The coverage has documented time limits on claim filing for theft and porch-piracy cases.

I have personal knowledge that the standard 7-day porch-piracy claim window described in Seel's program terms had elapsed by the time Creality first raised Seel coverage as a possible remediation path. Seel's program terms, the timing of Creality's first reference to Seel coverage in my case, and my own subsequent communications with Seel regarding the claim documentation requirements are all matters for which I have either documentary evidence or knowledge from direct experience that I am willing to substantiate to the bank.

When I previously attempted to engage with Seel during the period of the chargeback dispute, Seel's documentation requirements for the theft / porch-piracy claim category included a police report. Local law enforcement declined to write a police report on the underlying package issue, for reasons including: the package was a part of the original Creality order rather than a separate replacement; I had no prior possession of the package; the carrier identified on the tracking was an off-brand courier rather than a major carrier with verifiable delivery infrastructure; and no theft was witnessed because I never had the package in my possession at any point.

Creality's 2026-06-22 communication asserts that Seel has agreed to "extend" the case. I will submit a claim per Creality's instruction, in good faith and on the documentary record I have. I have no reason to believe Seel's documentation requirements have been relaxed, and I expect denial or extended-pendency status for the same documentation reasons that previously limited my ability to pursue the Seel pathway.

4. Documented Seel claim-handling concerns relevant to the bank's dispute

In the period between the original 2026-06-17 affidavit and the present supplemental affidavit, I have reviewed publicly-available consumer complaint records concerning Seel, Inc.'s handling of porch-piracy and non-delivery claims. The pattern relevant to the bank's evaluation of this dispute includes:

Documented fake-refund-confirmation behavior. A publicly-posted consumer review on Sitejabber documents an instance in which Seel reported a refund as processed via Venmo and provided a transaction ID. The consumer contacted Venmo to verify the transaction. Venmo confirmed that the transaction ID was not associated with any actual Venmo transaction. When the consumer presented this to Seel, Seel revised their position to state that the transfer "had not gone through." The pattern documented in this consumer's experience is consistent with the practice of providing fabricated transaction confirmations to consumers in order to cause those consumers to drop or withdraw pending chargeback disputes. The original consumer account is publicly readable at sitejabber.com/reviews/seel.com.

Documented claim-process biometric demands. Publicly-posted consumer complaints document instances in which Seel required a face scan from the claimant as a precondition for claim adjudication, with refusal of the biometric requirement resulting in claim closure without refund.

Documented denial pattern. Better Business Bureau complaint records and Sitejabber consumer reviews document a pattern of Seel denials including: claims received returns but no refund issued; claims stuck in "under review" status indefinitely; communication cessation following denial; manufactured grounds for denial (such as recategorization of damage type to defeat coverage). The advertised 99% approval rate is contradicted by the documented complaint volume.

Documented chargeback collision. At least one publicly-documented consumer chargeback has been filed against Seel itself, in addition to the underlying merchant, in connection with Seel's handling of a merchant-routed claim.

These records are public and verifiable. Source pages include:

- Better Business Bureau profile for Seel, Inc., San Francisco, California: bbb.org/us/ca/san-francisco/profile/information-technology-services/seel-inc-1116-962928/complaints
- Sitejabber Seel reviews: sitejabber.com/reviews/seel.com
- Trustpilot Seel reviews: trustpilot.com/review/seel.com
- Shopify App Store Seel Worry-Free Purchase reviews: apps.shopify.com/return-assurance/reviews

I document this public-record context because Creality's redirection of the case to Seel as a remediation path is materially affected by Seel's documented claim-handling pattern. The bank's dispute-process evaluation of Creality's response should weigh the practical availability of the Seel pathway against the documented complaint pattern, not merely against the existence of the program.

5. The merchant's request for direct ACH, wire, or SWIFT transfer information

Separately from the Seel redirection, Creality has requested that I provide ACH, wire, or SWIFT transfer information for direct deposit of a refund. I have declined this request and have so informed the merchant in writing.

I am informed and believe that, under card-network rules and standard merchant-card-processing practice, refunds for a card-funded purchase must be processed back through the original payment method. The merchant's request for a separate banking-channel deposit pathway is not consistent with standard card-network refund handling.

The combination of:

1. the merchant's redirection of the case to a third-party insurance program with documented chargeback-collision and fake-confirmation patterns; and
2. the merchant's separate request for direct banking-channel transfer information outside the card-network payment rail; and
3. the fact that both moves occurred during the active period of the chargeback dispute with my bank;

is, in my belief and in my experience, consistent with a coordinated attempt to defeat the active chargeback rather than to genuinely remediate the underlying dispute. I respectfully submit this observation to the bank for the bank's own evaluation under its dispute-process procedures.

I have not provided, and will not provide, direct banking-channel transfer information to Creality. I have not withdrawn, and will not withdraw, the chargeback dispute. I have not accepted, and will not accept, any refund-confirmation message from Creality or Seel as evidence of refund unless and until the actual receipt of funds is verified through my bank account or through the original card payment channel.

6. Continued attestation

I reaffirm the sworn statements made in my original 2026-06-17 affidavit in this same dispute. Nothing in the developments documented above changes the underlying factual record of the original affidavit. The merchant has not produced the carrier records, the proof-of-delivery records, or the warehouse pick list that would substantiate the merchant's representation that a Creality CR-Scan Otter 3D scanner was shipped to me. The merchant has instead redirected to Seel and requested direct banking transfer information. The bank's dispute process is the appropriate forum for resolution. The chargeback should proceed.

I respectfully ask that this supplemental affidavit be attached to my original 2026-06-17 affidavit in the bank's dispute file, and that the bank consider the combined record in evaluating any merchant response that asserts remediation has been offered or refund has been processed outside the original card-network channel.

7. Attestation

I declare under penalty of perjury under the laws of the United States that the foregoing is true and correct to the best of my knowledge.

This supplemental affidavit is digitally signed below using my published PGP key (fingerprint 9267 A71E 3F0A 4EED 2F97 3F9B A3E2 52F2 4635 CC6C). The signature allows the bank to verify that the document has not been modified after signing. The same key signed the original 2026-06-17 affidavit in this dispute.

Executed this 23rd day of June, 2026.
